Roll no: 6
Subject: Social Studies

Mid Term Exam - 2077

1) Thapathali-11, Kathmandu
2020/10/20

Dear Pratham,

I am glad to know that you scored 1st in the Social champ quiz. I am fine here. How are you? Is aunt fine? In this letter I am going to ~~say~~ write about the present status of drinking water in Nepal.

The current situation of water supply in Nepal is very critical. The city area only have a well water supply system but the village areas don't have a good drinking water ~~supply~~ supply system. So, the people of village use natural resources like stream, wells, etc. The villages have many water resources but it cannot be utilized by less people and the cities donot have many water resources. So, it is hard to manage.

~~So~~ This is the current situation of drinking water supply in Nepal. So, I hope you will write about 'Baglung' in next letter.

Your best friend,
Anuj Sapkota.

→ Melamchi drinking water project hasn't been completed

kill now because of

- The payment dispute with CMK in 2019.
- The accident of breaking of bulkhead gate in 2020.

2.

→ Manpower are the people who are educated, trained, skilled, experienced, energetic, physically healthy and mentally active, well-mannered and dedicated to their work.

→ Unemployment is increasing in Nepal because of many reasons like poverty, low literacy rate, etc. Many people of Nepal are very poor. They want to read and get a job. But, they can't afford to get a job due to poverty. Many people cannot get a job due to low literacy rate too. They cannot read and write so due to it, they cannot go to get a job. Political instability is also a reason of unemployment. Corruption is the biggest reason of unemployment. For eg; If A gives money to B to give C a job. Then, if d wants a job he can't get due to corruption.

3.

→ Nepal is a beautiful garden because there are ~~15~~ 125 castes of people who speak 123 languages and the people never fight with

each other. They always live together and peacefully maintaining social goodwill. They live in unity in diversity as they all are diverse from different castes, religion, etc. but they are united in themselves. They all have made Nepal a multi-ethnic, multilingual and multi-religious country. Nepalese people have a united bonding in themselves. There are 20 different religions but they all are always peaceful. They celebrate all their festivals together. They never ~~fight~~ fight with each other. For eg; there was a muslim mosque near the palace of king of Nepal but 1 drop of blood was ~~not~~ not dropped on the name of their caste and religion.

So, the diverse people of Nepal are like different flowers of a garden. Therefore, they have made Nepal a beautiful garden.

4. Solⁿ

→ ~~Given~~, We know,

$$\text{Kali Gandaki A [KGA]} = 144 \text{ MW}$$

$$\text{Mid-Marsyangdi [MM]} = 70 \text{ MW}$$

$$\text{Marsyangdi [M]} = 69 \text{ MW}$$

$$\text{Kulekhani I [KI]} = 60 \text{ MW}$$

$$\text{Khimti [K]} = + 60 \text{ MW}$$

Now,

$$\begin{aligned} \text{Total Capacity [TC]} &= (144 + 70 + 69 + 60 + 60) \text{ MW} \\ &= 403 \text{ MW} \end{aligned}$$

[3]

Now,

- Degree of KGA = $\frac{144}{403} \times 360 = 128.63^\circ \approx 129^\circ$

- Degree of MM = $\frac{70}{403} \times 360 = 63^\circ$

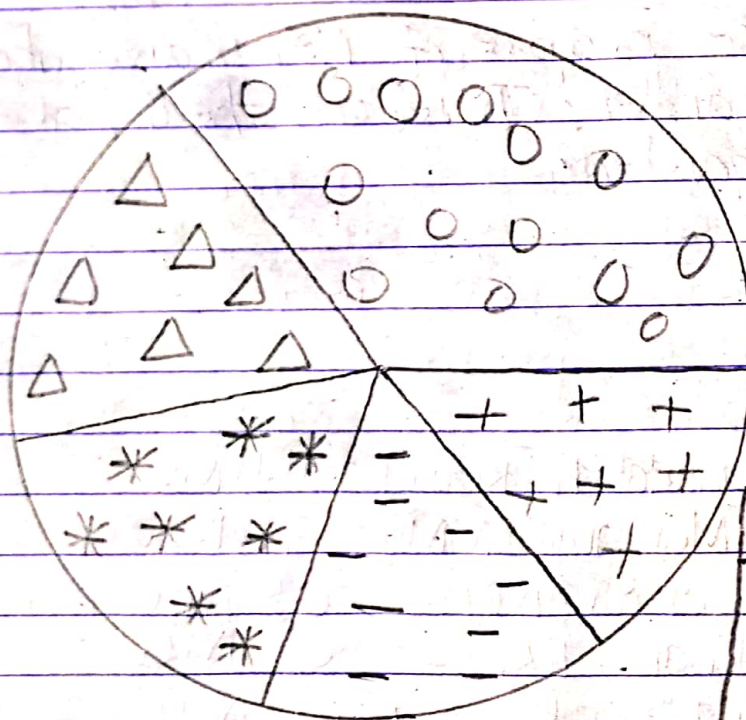

- Degree of M = $\frac{69}{403} \times 360 = 62^\circ$

- Degree of KI = $\frac{60}{403} \times 360 = 54^\circ \approx 53^\circ$

- Degree of K = $\frac{60}{403} \times 360 = 54^\circ \approx 53^\circ$

~~To~~

Pie chart,

Index

O - KGA

Δ - ~~MM~~ MM

* - M

- - KI

+ - K
